SKY-FRAME

Sky-Frame's position as the world's leading sliding window system was achieved through single-minded commitment coupled with profound technical, architectural and spatial design expertise with the location of development and production operations in Switzerland. Sky-Frame products now feature in several thousand properties across all continents.

Microsoft Azure

itnetX (Switzerland) AG stands for corporate technologies that surpass the usual IT standards. With over ten years of expertise, we offer support in all aspects of information and data processing. We are your partner of choice if you want to bring your company into the cloud, dream of modern digital workplaces or prefer to have nothing to do with your IT. You decide to what extent our services grow with your company. At itnetX, there are innovators, world change agents and geeks available to support you.

OUR SOLUTION – AZURE JOURNEY TO THE CLOUD

CHECK
Check what it takes to get from A. to Azure

DEFINE
Define your implementation based on our best-practises

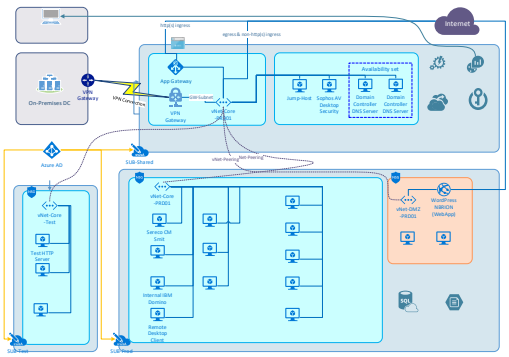
READY
Have your instances readied up

MOVE
Have your data moved to your Azure

As part of a modernisation of the IT services for Sky-Frame and to relieve the burden on the IT resources, a migration of the entire environment from On Premises to the Microsoft public cloud (Azure) is being evaluated and a corresponding operating partner is being sought for the long-term takeover of infrastructure operation.

Using a so-called "Lift & Shift" process, the required virtual machines are set up in "Azure", the associated data is migrated and the corresponding services such as "Security", "Networking", "Monitoring" and "Reporting" are implemented in the "Public Cloud". The customer's required Governance & Compliance guidelines are to be applied.

The Migration did include the move of 20 Virtual Machine from a local VMware Infrastructure using our modern MOVE Model together with optimization of the current application landscape.



WHAT OUR CUSTOMER ARE SAYING

"With itnetX we have a partner that supports us with top Microsoft Cloud professionals. They advise with profound expert knowledge in Microsoft Azure and Microsoft modern workplace management, implement accordingly and are available for operational assistance at any time."

René Habrik Head of Information Technology
Sky-Frame AG
